Event API

Event tracking lets you get rid of the guess-work. By tracking important actions when they happen, you're able to gauge how well a mechanic is being used and even track the overall progress of your players. See how often potions get used, items get bought and how many level-ups there are per day, month or year.

Learn more about events here.

Endpoints

Track events

`write:events`

POST `https://api.trytalo.com/v1/events`

Headers

Key	Required	Description
`x-talo-alias`	✅ Yes	The ID of the player's alias

Route params

None available

Query keys

None available

Body keys

Key	Required	Description
`events`	✅ Yes	An array of EventData

Sample request

Hide

```
{
  "events": [
    {

Types

EventData

```
type EventData = {
  name: string // name of the event
  timestamp: number // UNIX milisecond timestamp, e.g. 1656971058297
  props?: Prop[]
}

type Prop = {
  key: string
  value: string
}
```
