Game save API

Talo's save system allows you to persist your game's state across multiple sessions. Each object in your scene can be saved and restored automatically from one of your player's saves.

Learn more about game saves here.

Endpoints

Get a player's saves

`read:gameSaves`

`GET` `https://api.trytalo.com/v1/game-saves`

Headers

Key	Required	Description
`x-talo-player`	✅ Yes	The ID of the player

Route params

None available

Query keys

None available
