Leaderboard API

Talo aims to work across many different game genres and as such our leaderboards are highly-customisable. Leaderboards can be sorted by descending or ascending order. You can also customise whether players can only have one or multiple entries in a single leaderboard.

Learn more about leaderboards here.

Endpoints

Get a leaderboard's entries

`read:leaderboards`

```
GET https://api.trytalo.com/v1/leaderboards/:internalName/entries
```

50 results are returned per page, in the sort order defined by the leaderboard

Headers

None available

Route params

Key	Required	Description
`internalName`	✅ Yes	The internal name of the leaderboard

Query keys

Key	Required	Description

Key	Required	Description
`aliasId`	❌ No	Only return entries for this alias ID
`aliasService`	❌ No	Only return entries for this player alias service (e.g. steam, epic, username)
`endDate`	❌ No	A UTC Date (YYYY-MM-DD), DateTime (ISO 8601) or millisecond timestamp
`page`	❌ No	The current pagination index (starting at 0)
`playerId`	❌ No	Only return entries for this player ID
`propKey`	❌ No	Only return entries with this prop key
`propValue`	❌ No	Only return entries with a matching prop key and value
`startDate`	❌ No	A UTC Date (YYYY-MM-DD), DateTime (ISO 8601) or millisecond timestamp
`withDeleted`	✅ Yes	Include entries that were deleted by a refresh interval

Create or update a leaderboard's entry

`write:leaderboards`

POST `https://api.trytalo.com/v1/leaderboards/:internalName/entries`

If an entry exists for the player and the leaderboard mode is set to unique, that entry will be updated with the new score (and the updated key will return true)

Headers

Key	Required	Description
`x-talo-alias`	✅ Yes	The ID of the player's alias

Route params

Key	Required	Description
`internalName`	✅ Yes	The internal name of the leaderboard

Query keys

None available

Body keys

Key	Required	Description
`props`	❌ No	
`score`	✅ Yes	A numeric score for the entry
