Player presence API

The player presence API allows you to automatically track the presence of players in your game. This can be useful for a variety of use cases, such as showing a player as online or offline, setting custom statuses and friends lists.

Endpoints

Get a player's online status and custom status

`read:playerPresence`

GET `https://api.trytalo.com/v1/players/presence/:id`

Headers

None available

Route params

Key	Required	Description
`id`	✅ Yes	The ID of the player

Query keys

None available

Sample response Hide

```
{
  "presence": {
    "online": true,
```

```
    "customStatus": "I'm loving this game",
    "playerAlias": {
      "id": 1,
      "service": "username",
      "identifier": "jimbo",
      "player": {
        "id": "7a4e70ec-6ee6-418e-923d-b3a45051b7f9",
        "props": [
          {
            "key": "currentLevel",
            "value": "58"
          },
          {
            "key": "xPos",
            "value": "13.29"
          },
          {
            "key": "yPos",
            "value": "26.44"
          },
          {
            "key": "zoneId",
            "value": "3"
          }
        ],
